Farshad Tofighi

Backend Developer

👤 Profile

As a Backend Developer, I have been developing for over **+10 years** working with professional teams in some high-tech companies.
I have a deep understanding of developing software infrastructures like **microservices** and **monolithic** with proven experience of using **Agile Scrum** method in my career.

💼 Work History

Backend Developer at PoolTicket ⬈
March 2024 – Present
PoolTicket provides online booking for swimming pools with over **+1,500,000 users**. I improved **performance by 30%** and **reduced response times by 10%** through backend optimization. Additionally, I enhanced codebase stability, reducing errors and contributed to increase in user experience.

Skills: PHP - Laravel - Elasticsearch - MySQL - Redis - Unit Testing - RESTful APIs - Docker - Sentry

Backend Developer at Metanext ⬈
July 2023 – March 2024 – 9 mos
Metanext develops integrated CRM solutions. I implemented a **big data caching** system to boost retrieval speed and **optimized queries** to engineer a scalable infrastructure and enhanced performance.

Skills: PHP - Laravel - PostgreSQL - Redis - Unit Testing - RESTful APIs - Docker - Sentry

Backend Developer at IranServer Cloud ⬈
Jun 2020 – June 2023 – 3 yrs 1 mos
IranServer is a leading web hosting provider with over +300,000 customers. I Developed microservices by implementing design patterns such as **API Gateway** and **Saga Pattern**. Managed asynchronous operations with background jobs and utilized **RabbitMQ** to enhance scalability.

Skills: PHP - Laravel - Microservices - RabbitMQ - MySQL - Redis - Unit Testing - RESTful APIs - Docker - Sentry

Backend Developer at Sadjad University Research Center
July 2017 – Jun 2018 – 1 yr
The Research Center developed the Samanir platform for monitoring solar power plants. I implemented **real-time data** display and developed **multi-account support** for seamless access across devices.

Skills: PHP - Laravel - Node.js - MySQL - Redis
