

Farshad Tofighi

Web Developer

Profile

As a **Web Developer**, my career started with **PHP** and **Laravel**. Programming has always been my enthusiasm which gives me confidence. Since I got interested in **web development**, I started going deep and learning more about **Object-oriented programming**, **Solid principles**, and **Design patterns**.

I have been working with such professional teams using **Agile Scrum** in my career.

My passion is to move on the edge of technology. I am always looking forward to learning new technologies and broadening my skills in programming.
